

Here the nav bar and main should appear in a single section – then on scrolling next section containing the trusted technologies, then next section – tenantplane feature product and so on

No 2 sections should bleed in to each others

I'll later provide you with color codes and fonts – for now create this static website

Nav bar:-

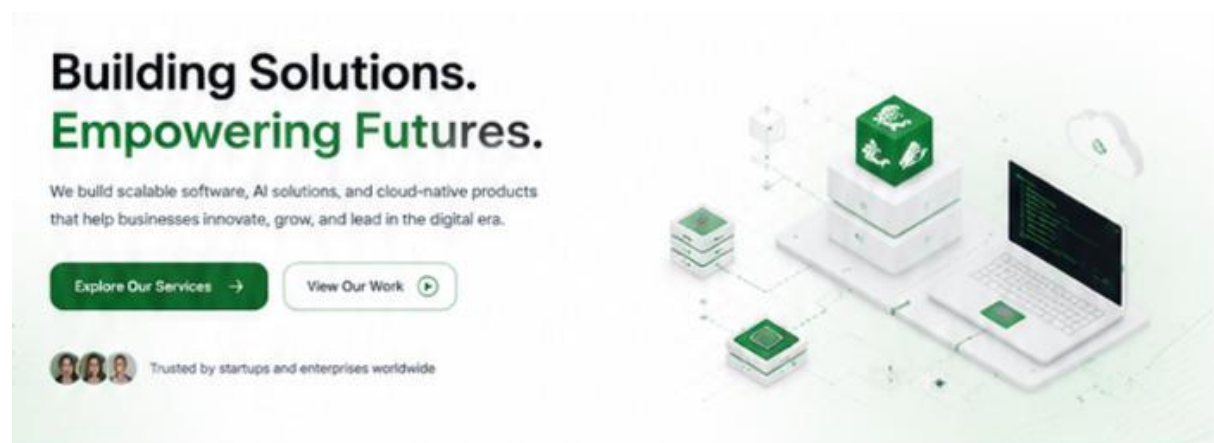

Things to be present in nav bar (logo on far left – I'll add it – keep a placeholder until then)

All buttons on the nav bar should be only for routing no drop downs

- Services
- Product
- About
- Blogs
- Let's talk (cta with arrow)

Main:- v3 (right below nav bar)

- Update the image on right – for now keep a placeholder – I'll add one later

Below the main section

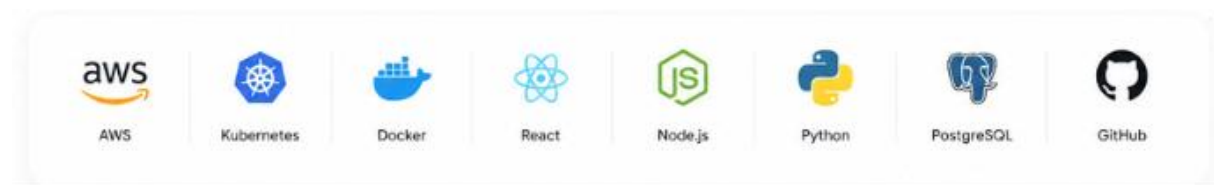

TechStackWeUse :- put the following title IN THE CENTER and below it marque

V3 :- Marquee look's look :-

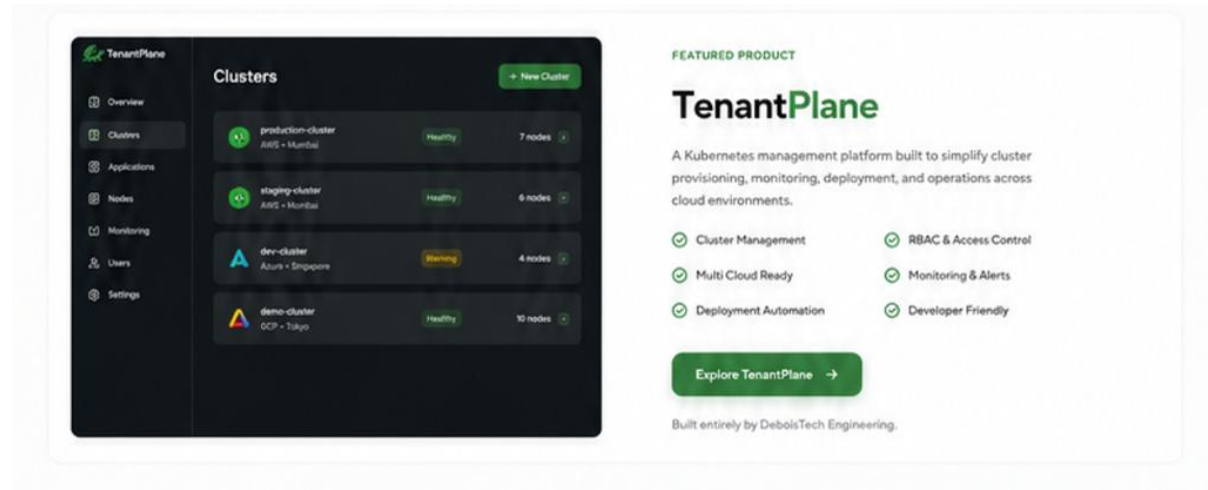

TechStackWeUse :- Marquee data:-

Below this marquee this section of our product :-

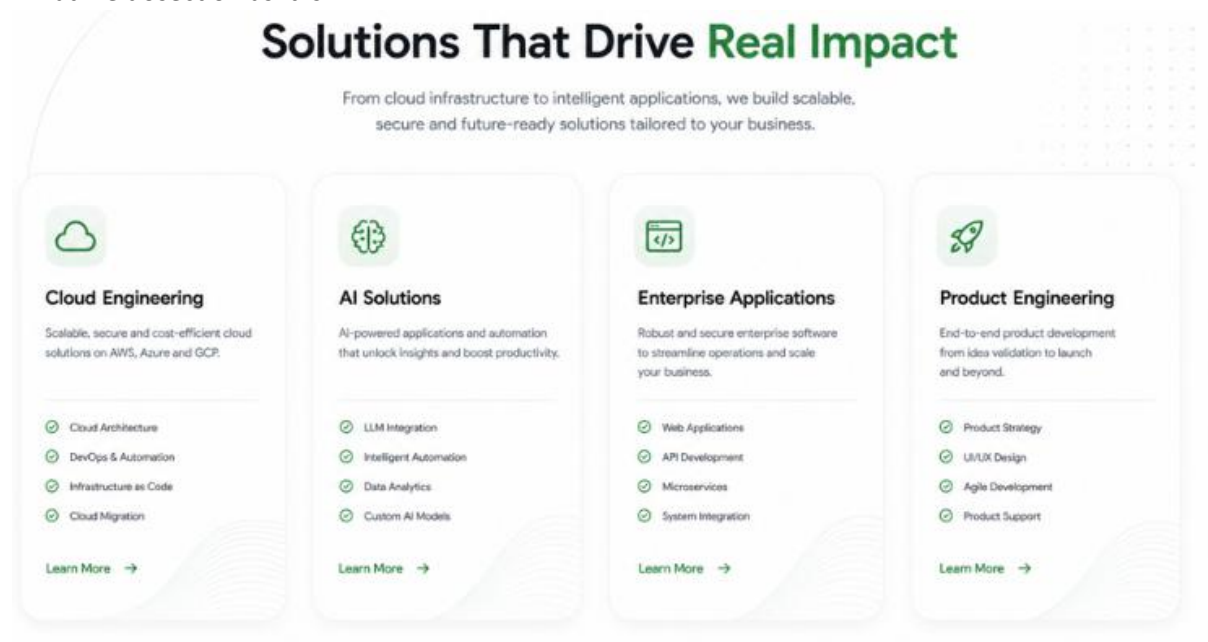

V2 feature product :-

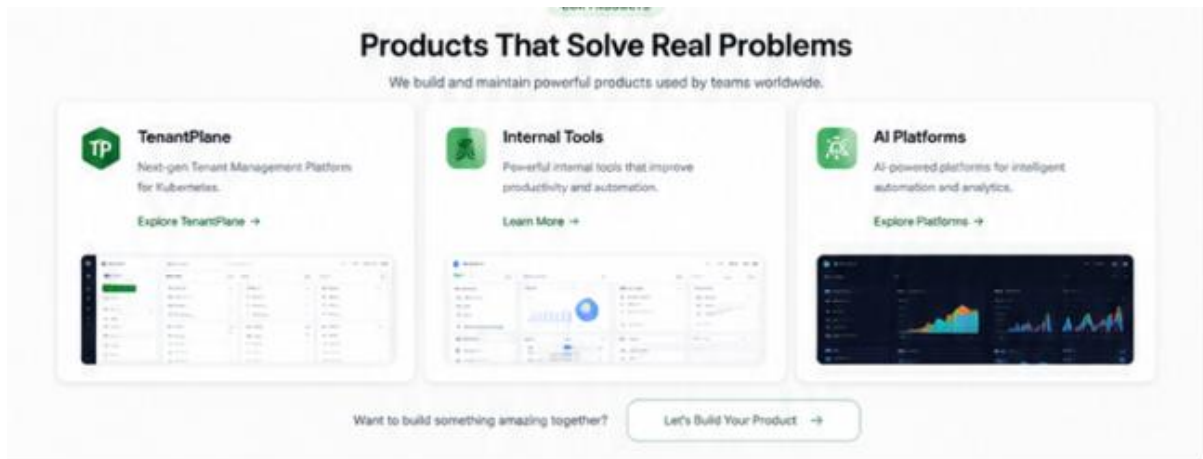

- Add image of tenantplane website (there is image on left and data on right – I'll add the image of website – add place holder for now)

Below this product section :-

What we do section as it is:-

V3:- Our product sections

- Update name to selected projects : - I will do that for now create these cards and placeholders
- Keep this section in a single window

V1:- Blogs

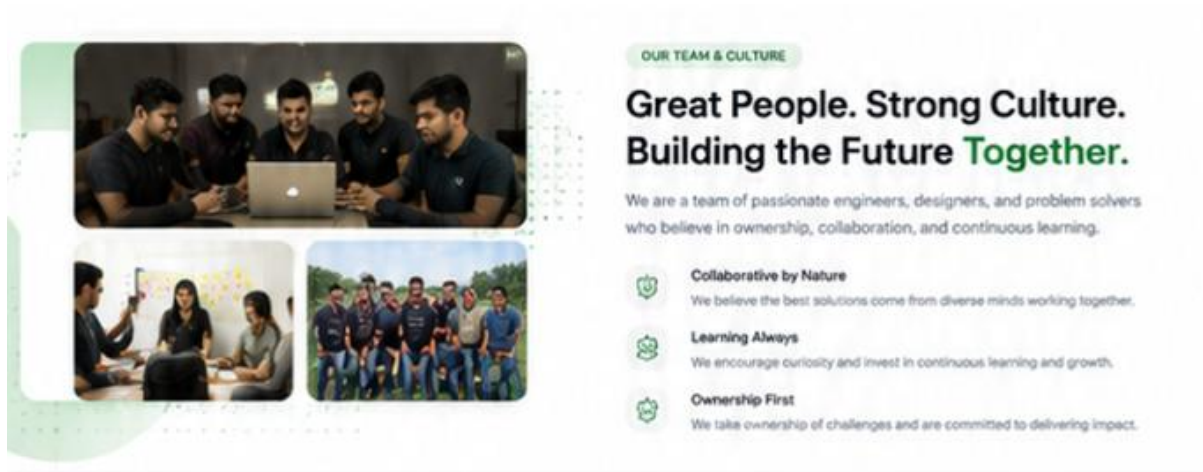

- Change to blogs data – same logic as before – create cards and placeholders

V1 : our development process :-
(interactive logo's in the circular section)

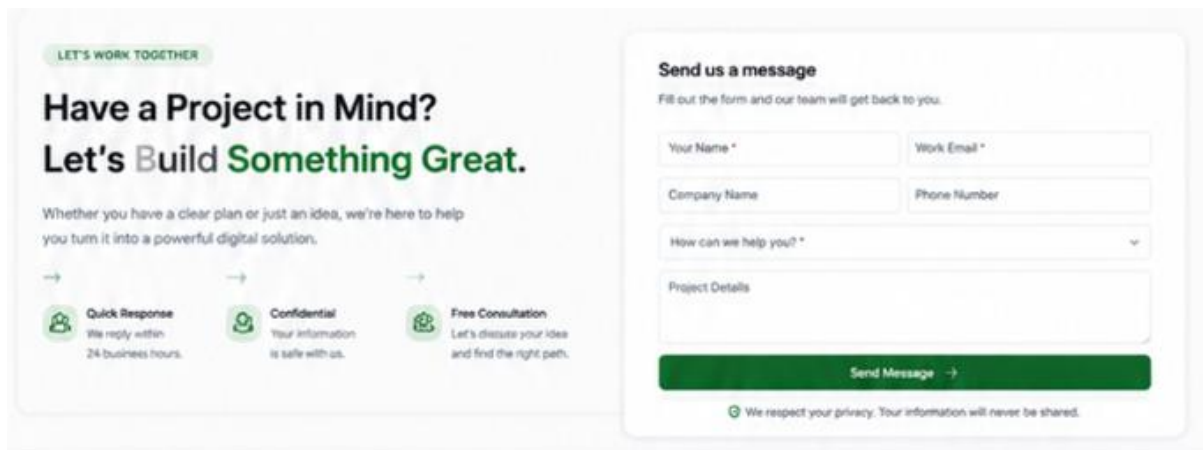

V3 : our team and culture :-

Same as before

V3: contact us :- as it is

V2 : footer:-

Change background colour to dark – match the green
